Log for last weeks (19.09.) activity from nature-park Karwendel was completed and will be sent to EW4DX in a few days.

About 300 contacts were made.

Special-QSL-card will be printed. QSL via DL7RAG (but you don´t need to send your own card, all QSOs will be confirmed automatically.)

A report on the activation can be found at:

http://www.winqsl.com/wordpress/u23/wordpress/?file_id=56

Read more infos in my blog at

After some weeks of silence for several reasons will start tomorrow morning to activate DLFF-207 Nature Reserve Main-Aue .

If everything works like planned, will reach destination at around 0700 UTC and try to start as soon as possible mainly as usual on 40 and 20 meters.

On return-trip will try we try to activate

the castle of Zwernitz (maybe around 11/12 UTC) WCA DL-03129 (FBN-301) located in DLFF-061 Nature-Park Fränkische Schweiz/Veldensteiner Forst.

Callsign DA0CW/p for DLFF-207 activity

If we reach the second destination too early (less then two hours after ending the first) will use for the second activity either DF6EX/p or DL/OK8WFF according to WWFF-rules.

As usual, please send no QSL-card, we don´t collect cards. You will get a photo-QSL automatically via buro and upload to WWFF and WCA-database will follow.

While touring to Altmühltal tomorrow I will check on the return-trip to activate DLFF-172 Tennenloher Forst.

However this park has been activated two times before, there were only 15 contacts made ever.

So this is the rarest park in germany (from the activated areas).

Everything depends of course on weather and traffic on the road.

So if possible to reach, I´ll try to be there in the second half of the afternoon.

Currently cannot give a better time-frame.

Hope if everything works to work you on the band, 73, 44, Manfred DF6EX

Team DA0CW (Günther DC2RK, Xaver DK4RM and Manfred DF6EX),

plan to activate two new WWFF-references in Czech Republic.

At august 30, they start around 0600 UTC from nature-reserve Smradoch
OKFF-0943.

plan is to make three hours activity on 10/17/20/30/40 meter working
simultaneous with two stations.

Around 0900 UTC they will move to the nature-reserve Vlcek OKFF-1102 were
they will be active

also for around 3 hours. Maybe near the end there is also a short activation
from Slavkovsky Les

OKFF-0006 possible.

The calls will be either OK8WFF/p or their individual calls OK/DC2RK,
OK/DK4RM, OK/DF6EX.

Please don´t send a QSL-card your own, we don´t collect for our
portable-activities.

You will get automatically a photo-QSL-card from us via the buro.

SWL-reports can be confirmed with a mail to: <mailto:da0cw@...>
da0cw@...

Further informations or shorttermed changes can be found at:

Not secure, but will try !

If I´m coming out in time from my office tomorrow, will try to activate castle Thierstein DL-03142 / FBN-314.

Activity probably happens around 1300 or 1330 UTC probably later.

If you hear DA0WCA, will be active from the castle.

Alternatively will be active from DLFF-305, then using DA0CW/p

Theoretically also both would be possible, but not sure.

So everything depends on weather and leaving QRL right in time.

Hello,

sorry but I indicated in todays activity with DA0WCA the wrong ref.number.

Activity was from DL-03145 (FBN-317) and not as I indicated DL-03142, very sorry but it was definitely a new one.

I wrote it also wrong in yesterdays email, I´m getting too old J

Thank you for the more than 200 contacts.

Hello, not sure but if health and weather allows we will try to be active from DLFF-306 Pegnitzaue (new one) on Sunday 27.09. Call DA0CW/p (start would be around 0700-0800 UTC).

There is also not too far away the castle of Veldenstein. So maybe following DL-03055 (FBN-008), if that would be possible, Call DA0WCA (maybe around 1000-1200 UTC).

But as usual, no guarantee, please check the cluster.

Hello,

will be in the area of DLFF-309 (Nature-Reserve Pfahl) in the afternoon.

So if activity possible will try to be active as DA0CW/p.

If you can spot me, thank you, don´t know if there is web-access, much wood around.

As usual, you don´t need to send a QSL. All contacts confirmed automatically and we don´t collect cards.

If you don´t want further activity mails please a small comment, then you will be removed from mailing-list.

If there is no chance for DLFF-309 will alternatively try DLFF-144.

Hello,

Felix DE3DKW and Manfred DF6EX will try to be active at july 02 at first from

OKFF-0401 Bucina u Zdaru (scheduled for about 0630-0800 UTC) with the callsign OK8WFF/p

And later from

OKFF-1010 Tisina (scheduled for about (0815-10 UTC) with the callsign OK/DF6EX/p

Both were never activated before.

Everything depends on the weather, both areas are in the middle of the wood and we have to go several kilometers to reach them, so when bad weather appears we need to cancel or brake down in the middle of the operation.

I think we will have no cluster connection, so if you hear us, please spot us, thanks in advance.

As usual, please don´t send a card, we dont collect cards. All contacts will be confirmed automatically from our side, but don´t send yourself a card.

SWL send simply a mail to da0cw@... <mailto:da0cw@...> and you will get a confirmation.

OKFF-1010 Tisina (scheduled for about (0815-10 UTC) with the callsign OK/DF6EX/p

Both were never activated before.

Everything depends on the weather, both areas are in the middle of the wood and we have to go several kilometers to reach them, so when bad weather appears we need to cancel or brake down in the middle of the operation.

I think we will have no cluster connection, so if you hear us, please spot us, thanks in advance.

As usual, please don´t send a card, we dont collect cards. All contacts will be confirmed automatically from our side, but don´t send yourself a card.

SWL send simply a mail to da0cw@... <mailto:da0cw@...> and you will get a confirmation.
